

Instructional Design: Small Group

If we have more than 5 students in Tier II, what do we do with the remaining students in Tier II at the time we are seeing 5 of them in small group?

The other Tier II students should be engaged in work stations, as the rest of the class. You will have to plan the station rotations to ensure the second group has an opportunity to meet with you during small group time, as well.

Unique solution ID: #1081
